
Shoe factory for v. high quality product needed

Posted by Amazona - 2008/07/10 14:23

Does anyone know of a factory/manufacturer that can produce very high quality women's shoes that is will to work with a relatively young business?

Alternatively, does anyone have any contacts in footwear that may know of somewhere or would be able to suggest where I should be looking to find somewhere?

(Country of production is no issue to me providing the quality is excellent)

I'd be very grateful of any help or suggestions!

Thanks
