Hi,

I would like to invite you to design your own dress.

We have just launched [www.StyleShake.com](http://www.StyleShake.com) where you can design a dress and wear it in 10 days. I would love to know what you think.

Step into our design studio and get started.

I think our users need more information before they can answer this???

What is the target market...how will they make their own dress...are you going to supply fabric, patterns, sample machinest?

WHY?
