
new entry for business directory

Posted by illumine - 2008/03/20 06:00

Hi,

I am facing problems in registering a new entry in the business directory. The "Add category" section asks to choose only subdirectories, while the directories do not show any subdirectories at all. Could somebody please suggest how this can be handled.

Best Regards

Hi

The problem has been solved, It was an error that occurs only for internet explorer, now its possible to select categories without problem.

Thanks for your custom

Kind Regards

Admin

I had the same problem. The problem WAS Internet Explorer but more to do with "Java Scripts". My solution was to change the browser and then add the categories. I downloaded firefox, works great.
