
problems in mozilla based browsers

Posted by llasx1 - 2006/03/03 23:44

Hello...

Just thought I'd leave a note that there's some difficulty displaying the following pages in mozilla based browsers. I am using Firefox 1.5...

Pages with difficulties

The "register" form page. (multiple lines of text near the header are aligned atop one another)

All the "sitemap" pages. (Some of the globes that render in IE are not present in Firefox, and the tabs along the left side of the page is out of whack.

Other than that, I like the site very much!

I had stopped by to promote a new fashion directory that's (hopefully) taking off...

Thanks for the support!

Also I will alert the web hosters to your comment about Mozilla based browsers too.
